

Toujeo® (insulin glargine 300 units/mL) Guide for patients and/or carers

Toujeo® SoloStar® is a prefilled injection pen which contains insulin glargine 300 units per mL. Toujeo® lowers your blood sugar steadily over a long period of time. It is used once a day.

The dose window of the Toujeo® SoloStar® pen shows the number of UNITS of Toujeo to be injected.

- X Do not make any dose re-calculation. Start with the dose in units written on your prescription.**
- Toujeo® (insulin glargine 300 units/mL) and insulin glargine 100 units/mL are not the same and you must not switch between them without consulting a healthcare professional to adjust the dose.
- Always follow the dose recommended by your healthcare professional.
- Your blood glucose needs to be closely monitored during the switch and the initial weeks thereafter.
- Please consult your healthcare professional for further information.

SANOFI DIABETES 

Before injecting Toujeo

- ✓ Read the instructions for use in the pack or watch the instructional video (see QR code right).

- ! If you do not follow all of these instructions, you may get too much or too little insulin.

If you get any side effects, talk to your doctor or pharmacist. You can also report side effects to Sanofi by telephone on 1800 818 806 or email medinfo.australia@sanofi.com
